Pantoprazole 40mg Tablet

MODE OF ACTION

- A proton pump inhibitor (PPI)
- Act by irreversibly blocking the hydrogen/potassium adenosine triphosphatase enzyme system (the H+/K+ ATPase) of the gastric parietal cells, which is the terminal step in acid production
- Significantly more effective than H2 antagonists
- Used to treat gastroesophageal reflux disease (GERD), a condition that causes gastric juice to flow backward from the stomach and into the esophagus
- Also treats conditions in which the stomach makes excess acid, including Zollinger-Ellison syndrome
